Dear Sir:

We are preparing a bibliography of finds of Greek coins. In the Notizie d. Scavi for 1906 there is the report of a find made near Maruggio, and it is stated that part, or the whole, of this find came into the possession of your Museum. Can you tell me whether this portion which you possess comprises the entire find or not? If you could give me some indication of the coins contained therein, I should greatly appreciate it.

Thanking you in anticipation for your cooperation, I am

Very truly yours,

Secretary

Com. Quintino Quagliati
Director R. Museo Archaeologico
Taranto, Italy

Dear Sir:

Your interesting article on the hoard of coins found in your city last August, published in the October number of "Rassegna Numismatica", is before me. You will possibly recall that I have been working on the coins of Metapontum for a number of years and this hoard is of very great interest to me for that reason. May I ask whether it would be possible to have casts made of these coins at my expense? I should desire casts of the Metapontum coins, those of Heraclea and the Velia only. If this is not possible, could photographs showing the obverse and reverse of the entire hoard be made (also at my expense)? I feel sure you will realize the great interest that such a hoard has for my study, and I trust that we may rely upon your cooperation.

With assurance of cordial esteem, I beg to subscribe myself,

Very sincerely yours,

Secretary.
